ALUMINIUM WINDOWS AND DOORS

- ▶ We can manufacture a range of products to suit your requirements
- ▶ Good for windows and doors according to measurements according to reality taking into account the origins of workmanship.
- ▶ **Window Sliding System**
 - ▶ □ The company provides multiple segments of the draw system.
 - ▶ □ Can be executed according to your desire in terms of the number of glass layers.
 - ▶ □ Features smooth movement and sealing.

SAMPLE

PRODUCT FEATURES

- ▶ Model aluminum sliding window have four advantages: New upgraded window bottom track makes the opening more smoothly.
- ▶ 1- Double tempered glass with reflective design can make the people "inside can see outside, outside cannot see inside".
- ▶ 2- Two-point lock system make the window better working on anti-theft function.
- ▶ 3- All using the skilled master do the assembled work, every corner have 45 degree perfect assemble.
- ▶ **Window Hinger System**
 - ▶ □The company provides multiple segments of the draw system.
 - ▶ □Can be executed according to your desire in terms of the number of glass layers.
 - ▶ □ Features smooth movement and sealing.

Specifications

For waterproofing and tank material

Method and steps for internal insulation of tanks by supplying and installing according to the following

- 1- Complete cleanliness
- 2- Making the sanding and cracking of excess and weak ground and walls.
- 3- The work of treating broken, nesting, and cracked places in the walls and floors of Rend Roc TG.
- 4- Cracking the corners with a thickness of 5 x 5 and installing it with Mape grout repidio.
- 5- Sanding with a missile for the entire tank.
- 6- Filling places with Fc material with SBR from Fossam.
- 7- Sanding by hand.
- 8- Cleaning work with an air, vacuum and washing machine to prepare and receive walls for cement and rubber insulating materials.
- 9- Making the first side of the cement wall insulation material, Nito Coat CM210 From Fosroc.
- 10- Do the second side of nitocoat fx 110 weber co after 24 hours from the other side

Specifications

For waterproofing and pool material

Method and steps for the internal insulation of the pool by supplying and installing according to the following

- 1- Complete cleanliness.
- 2- Making the sanding and cracking of excess and weak ground and walls
- 3- The work of treating crushed, cracked, and cracked places in the walls and floors of Rend Roc TG.
- 4- Cracking the corners with a thickness of 5 x 5 and installing it with Mape grout repidio
- 5- Sanding with a Grander for the entire pool
- 6- Filling places with Fc material with SBR from Fossam
- 7- Sanding by hand.
- 8- Cleaning the air, vacuum, and washing machines to prepare and receive the walls for the cement and rubber insulating materials.
- 9- Making the first side of the cement wall insulation material Nito coat CM 210 from fosroc.
- 10- Action of the second side of nitocoat fx 110 fro weber co 24 hours after the first face
- 11- Removing old scrap, removing emery, installing new scrap and installing it again.

Specifications

Epoxy paint for floor

The work of epoxy paint with materials in a project in the following way.

- 1- Complete cleanliness and removing destruction and dust from the floor.
- 2- The work of crushing extra plank from the ground.
- 3- The work of treating broken places with Hi Flow Mapegrout from Italy.
- 4- The work of leveling the fossils in the floor with TG Rind roc with SBR Bond from Fossam.
- 5- Clear work of the entire floor in an artistic manner.
- 6- Extending the cracks with a Grander completely.
- 7- Washing after scrubbing and filling the pyramids and the cracks with the special paste T.C.2000 from Fossam Company.
- 8- Doing sanding and cleaning the floor in an artistic way.
- 9- Making basis for Nitoprimer 31 from Fossam.
- 10- Make a first face of epoxy Nito fl E E U 100 from fosam co
- 11- Making small pyramids filling and repairing blanks with T.C. paste. 2000
- 12- Make a second face with an epoxy of the same type after 24 hours.
- 13- The supply and installation of Expansion joints in Foam Rad
